<sup>1</sup> Consolidated financial results are prepared under IFRS. Reporting periods of the Company are 3M, 6M, 9M and 12M. Quarterly figures are obtained by calculation, including in the segment reporting. Figures for comparable periods may differ from figures posted earlier because of rounding off to integers.

<sup>2</sup> EBITDA is the operating profit before equity share in financial results of joint ventures, impairment of capital assets and losses from retirement of fixed assets, allowed for amortization and depreciation. EBITDA calculations and further details are presented in the Appendix.

<sup>3</sup> Profit for the period attributable to NLMK shareholders.

## NLMK GROUP Q3 2019 IFRS CONSOLIDATED FINANCIAL RESULTS

### Key highlights

#### Comment from NLMK Group CFO Shamil Kurmashov:

“Q3 2019 saw the situation on the steel markets aggravate due to a weakening in demand and the resulting decline in steel prices, amid an economic growth slowdown in the Company’s key international sales regions.

“NLMK continued overhauling its blast furnace and basic oxygen furnace operations, which will enable the Company to grow its steel output by 1 million tonnes by 2021 to 14.2 million tonnes per year. The overhauls drove the Company’s steel product sales down by 6% qoq.

As a result, NLMK Group’s revenue dropped by 8% qoq. EBITDA was down to \$654 m, while EBITDA margin stood at 25%, or 1 p.p. down from Q2, caused by narrower price spreads.

“Net debt/EBITDA stands at a comfortable 0.59x (0.39x as at the end of Q2 2019). This growth was driven by keeping dividend payments high against the backdrop of investment as part of executing NLMK Group’s strategy.

“Free cash flow totalled \$249 m. Positive free cash flow, Net debt/EBITDA below 1.0x and dividend policy implementation enabled the Company’s management to recommend NLMK’s Board of Directors \$300 m in Q3 dividends.”

*\*EBITDA used in NLMK's financial releases is calculated as operating profit before equity share in net losses of associates and other companies accounted for using the equity method of accounting, impairment and write-off of assets, adjusted to depreciation and amortization. EBITDA is not an indicator of operating profit, operating activity or liquidity under IFRS, and NLMK discloses it because equivalent indicators could be used by investors and analysts. That said, NLMK's EBITDA should not be viewed on a standalone basis, or in place of profit before tax, or cash flows from operations, as defined by IFRS, or as an indicator of operational efficiency, or as the sum of free cash funds that NLMK can invest into business development. NLMK's EBITDA margin and EBITDA might not be comparable to similar indicators disclosed by other companies as there are no commonly accepted rules for calculating them. For instance, NLMK's EBITDA is calculated similar to what is termed as 'Adjusted EBITDA' in other companies, as NLMK's EBITDA excludes other profit/loss items in addition to interest payments, income tax, depreciation and amortization.*

\* EBITDA used in NLMK's financial releases is calculated as operating profit before equity share in net losses of associates and other companies accounted for using the equity method of accounting, impairment and write-off of assets, adjusted to depreciation and amortization. EBITDA is not an indicator of operating profit, operating activity or liquidity under IFRS, and NLMK discloses it because equivalent indicators could be used by investors and analysts. That said, NLMK's EBITDA should not be viewed on a standalone basis, or in place of profit before tax, or cash flows from operations, as defined by IFRS, or as an indicator of operational efficiency, or as the sum of free cash funds that NLMK can invest into business development. NLMK's EBITDA margin and EBITDA might not be comparable to similar indicators disclosed by other companies as there are no commonly accepted rules for calculating them. For instance, NLMK's EBITDA is calculated similar to what is termed as 'Adjusted EBITDA' in other companies, as NLMK's EBITDA excludes other profit/loss items in addition to interest payments, income tax, depreciation and amortization.
